Contents Vol. 129

Provenance of a late Proterozoic–early Cambrian basin, Sierras de Córdoba, Argentina
J.J. Schwartz and L. Peter Gromet 1

Equatorial Baltica in the Vendian: palaeomagnetic data from the Sarek Dyke Swarm, northern Swedish Caledonides
E. Eneroth and O.M. Svenningsen 23

Clastic sedimentation in a late Archaean accretionary terrain, Midlands greenstone belt, Zimbabwe
A. Hofmann, P.H.G.M. Dirks and H.A. Jelsma 47

Paleomagnetism of the Neoproterozoic Chuar Group, Grand Canyon Supergroup, Arizona: implications for Laurentia's Neoproterozoic APWP and Rodinia break-up
A.B. Weil, J.W. Geissman and R. Van der Voo 71

An equatorial Laurentia at 550 Ma confirmed by Grenvillian inherited zircons dated by LAM ICP-MS in the Skinner Cove volcanics of western Newfoundland: implications for inertial interchange true polar wander
J.P. Hodych, R.A. Cox and J. Košler 93

Provenance of the Proterozoic Thelon Basin, Nunavut, Canada, from detrital zircon geochronology and detrital quartz oxygen isotopes
S.E. Palmer, T. Kurt Kyser and E.E. Hiatt 115

Relationship between detrital zircon age-spectra and the tectonic evolution of the Late Archaean Witwatersrand Basin, South Africa
N. Kositcin and B. Krapež 141

Basement tracing using Mid-Proterozoic anorthosites straddling a palaeoterrane boundary, Ontario, Canada
S.A. Prevec 169

Discussions

Comment on "C, O, Sr and Pb isotope systematics of carbonate sequences of the Vindhyan Supergroup, India: age, diagenesis, correlations and implications for global events" by J. S. Ray, J. Veizer and W.J. Davis. [Precambrian Res. 121 (2003) 103–140]
P.P. Chakraborty and A. Sarkar 185

Reply to comment by Chakraborty P.P. and Sarkar A. on "C, O, Sr and Pb isotope systematics of carbonate sequences of the Vindhyan Supergroup, India: age, diagenesis, correlations and implications for global events"
J.S. Ray and J. Veizer 189

Comment on "C, O, Sr and Pb isotope systematics of carbonate sequences of the Vindhyan Supergroup, India: age, diagenesis, correlations and implications for global events" by J.S. Ray, J. Veizer and W.J. Davis. [Precambrian Res. 121 (2003) 103–140]
S. Kumar 191

Reply to comment by Kumar S. on "C, O, Sr and Pb isotope systematics of carbonate sequences of the Vindhyan Supergroup, India: age, diagenesis, correlations and implications for global events"
J.S. Ray and J. Veizer 195

doi:10.1016/S0301-9268(04)00033-6

Special Issue
Some Advances in the Study of Proterozoic Sedimentary Basins of North America

Preface 199

The tectonostatigraphic evolution of the Huronian basement and the subsequent basin fill: geological constraints on impact models of the Sudbury event
D.G.F. Long 203

Fluvial, lacustrine and volcanic sedimentation in the Angikuni sub-basin, and initiation of ~1.84–1.79 Ga Baker Lake Basin, western Churchill Province, Nunavut, Canada
L.B. Aspler, J.R. Chiarenzelli and B.L. Cousens 225

Early Proterozoic geomagnetic field in western Laurentia: implications for paleolatitudes, local rotations and stratigraphy
E. Irving, J. Baker, M. Hamilton and P.J. Wynne 251

Revisions to the Paleoproterozoic Sequence A, based on reflection seismic data across the western plains of the Northwest Territories, Canada
B.C. MacLean and D.G. Cook 271

Linking the Mesoproterozoic Belt-Purcell and Udzha basins across the west Laurentia–Siberia connection
J.W. Sears, R.A. Price and A.K. Khudoley 291

Petrogenesis of the 723 Ma Coronation sills, Amundsen basin, Arctic Canada: implications for the break-up of Rodinia
J.G. Shellnutt, J. Dostal and J.D. Keppie 309

CO_2-clathrate destabilization: a new model of formation for molar tooth structures
D. Marshall and C.D. Anglin 325
